

FLEXO PRESS ALIGNMENT & REGISTER CHECK

- Main C.I printing section alignment and register mechanism checks completed in a 2 day site visit.
- Each register assembly mechanism will be inspected for correct assembly and operation functionality.
- All existing on press print roll equipment will be inspected against original press manufacturing tolerances.
- Level checks will be made on the main Impression cylinder and each individual print deck.
- Corrective alignment action will be taken where possible subject to permitting time schedule.
- Detailed visit report will be issued with precise recommendations and necessary actions.
- Improvements to press performance are as follows;
- **MORE ACCURATE PRINT REGISTRATION**
- **IMPROVED WEB TRACKING**
- **IMPROVED TENSION CONTROL**
- **INCREASED PRODUCTION EFFICIENCY**
- **REDUCED VIBRATION / WEAR**
- **REDUCED WASTE**
